

Attenuated vaccines

Contain **weakened SARS-CoV-2 virus**.

The weakened virus is recognised by the immune system to trigger a response without causing illness.

This response builds immune memory, so your body can fight off SARS-CoV-2 in future.

Considerations

A well-known approach which requires time and extensive testing.

The immune response resembles the natural infection.

Examples in human use for other disease

Oral Polio vaccine

In clinical trials for COVID-19

Codagenix
