

Another day, another adventure for... **THE AMAZING ANTIBODIES**

A new virus gets into the body...

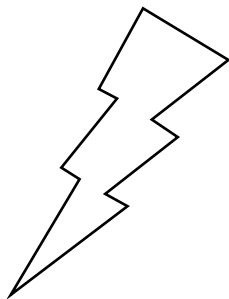

ACTION TIME! The immune system desperately tries to find the right antibody to fight the virus

Meanwhile, the virus is reproducing to make more and more virus particles...

The person gets sick

Finally! The immune system finds the right antibody and defeats the virus! KA-POW!

A few months later the virus tries to strike again. But the immune system is ready for it...
